About Ika Shoku

Ika Shoku is a 15 year old Inkling living in the Smash Universe. She is infamous for being a glutton and having a seemingly bottomless stomach. She's pretty much always seen eating something or craving something. Her preferred food is fish, but she'll eat anything else. She doesn't know how to cook or bake and depends on others to do so for her. Fishing, however, is one of her favorite pastimes. Even though she's 15, she's very child-like and loves to play and climb trees. Despite her larger figure, she's agile and considerably speedy. She has a massive collection of stuffed toys that reside in her messy room. Along with being playful and having boundless energy, she cries a LOT. Ika is very sensitive and emotional and easy to make cry. Contrary to her normally childish personality, she can also be very motherly if given the chance. She loves to take care of things and has a sense to protect defenseless critters. She considers most, if not all living things her friend if they aren't hostile towards her. When she's not eating or playing, she's probably sleeping. She's quite lazy and loves to nap. She likes to sleep in warm, comfy places. One of her favorite places is the couch. She'll steal pillows and blankets from around the apartment if she isn't warm enough or comfy enough.
